

HANSEN TURBINE

Responsive People Responsible Performance

Axial Flow Compressor Components

Reduce costs and downtime with Hansen Turbine's American made compressor section blading, VIGV's, and stator ring segments and vane assemblies. Hansen is ISO 9001:2015 certified.

HANSEN TURBINE

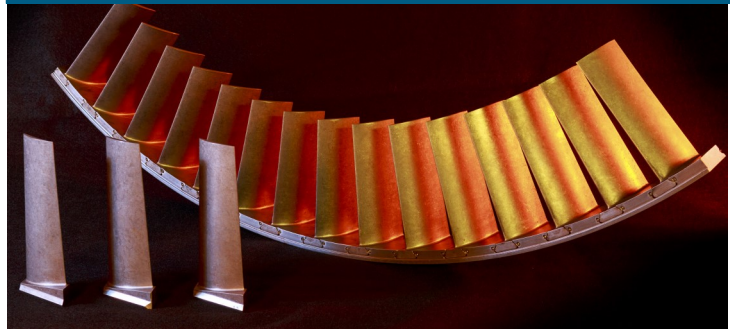

Responsive People Responsible Performance

Axial Flow Compressor Components

Reduce costs and outage downtime with Hansen Turbine's American made axial flow compressor section blading, VIGV's, stator ring and vane assemblies. Our extensive inventory of rotating and stationary compressor blading is manufactured from 403, 403CB or C450 to meet your needs.

We manufacture replacement blades for all major OEM models. Spacers, shims and other model-specific hardware are available to simplify your procurement process.

Take advantage of Hansen Turbine's in-house coating capabilities to improve compressor performance and eliminate the risk of delays, loss or damaged parts. Hansen Turbine is ISO 9001:2015 certified.
